## Reagan orders disaster relief for Pennsylvania

The ASSOCIATED PRESS

President Reagan signed a disaster declaration for 12 Pennsylvania counties Monday as officials attempted to measure the damage caused by a line of tornadoes that swept through parts of the state and Canada, killing at least 27 people. These storms are among the worst ever taken by a TV toll," Reagan said. "I sympathize with the people of this region at a time when they face their fears in facing the tremendous task of rebuilding their lives and communities after the storm."

"We had people who came in saying that they have an extra room or an extra home for people who need it," said Mary Jane Dell, director of the Niles, Ohio, branch of the Red Cross.

"Four or five companies are doing wonders for the people," Dahlin said. "There are other companies that people can find to help adjusters or even their agents."

Red Cross officials, who handed out food and clothing vouchers to the homeless, said response for aid had been overwhelming.

"We had people who came in saying that they have an extra room or an extra home for people who need it," said Mary Jane Dell, director of the Niles, Ohio, branch of the Red Cross.

cologist will speak at Forum assembly

Paul A. Cox, a plant ecologist who searches tropical rain forests for medically valuable plants, will speak at today's Forum assembly.

The assembly begins at 11 a.m. in the de Jong Concert Hall of the HFAC, where Cox will speak on "Incommunicado."

Cox, a 1971 graduate of Orem High School and now an assistant professor of botany at BYU, observes that humans are generally insensitive to the myriad of plants around them.

"Humans are held incommunicado if they do not make an attempt to understand other cultures and alternative modes of expression," Cox said.

Cox uses his knowledge of the Samoan language to gather information on plants in that country.

Cox holds a Ph.D.'s degree in ecology from BYU in 1976, a master's degree in ecology from the University of Wales in 1978, and master's and doctoral degrees in biology from Harvard University in 1978 and 1981 respectively.

## Shuttle astronaut officiates at reading room opening

By HEATHER EBELING  
University Staff Writer

Dr. M. Rhea Seddon, the only woman astronaut on the Discovery 51-D Space Shuttle mission, officiated at the ribbon cutting ceremony marking the opening of the "Women in Science" reading room of the Harold B. Lee Library on Saturday.

"Being a wife, mother, doctor and astronaut is hard work but if you want it you can do it," said Seddon.

"This is a great opportunity for BYU to develop an area for women in science," she said. "I hope BYU will produce a woman astronaut which will bring recognition to this university."

The Women's Research Institute received a \$20,000 grant from the National Science Foundation three years ago, which was used for funding for

the reading room, said Ida Smith, coordinator of Alumni Continuing Education. Utilization of the funds was planned in three phases.

The first phase was a women's conference that took place in October 1981 at BYU. Thirty individuals—27 women and three men—represented each of the nine states. The second phase was another conference at BYU in April 1982.

The third phase had two portions. The first portion was to have one of NASA's women astronauts come to BYU and speak, and the second was to build a visible area in the library dedicated to women in science and those studying science. The Discovery crew's weekend visit to BYU allowed both portions to be realized.

"The room will be outfitted with computer terminals, books, magazines and other materials to give students historical information on women in

## Council releases study results on nuclear testing cancer rate

Says deaths 'may well have resulted from chance'

WASHINGTON (AP) — Soldiers and sailors exposed to radiation at two U.S. atomic test sites in the 1950s are showing higher-than-normal death rates from certain cancers, the National Research Council reported Monday.

However, authors of the council's study also said that excess deaths "may well have resulted from chance" since no similar results are found at other test sites.

The project, studying death certificates of 46,000 witnesses at five separate nuclear test series, confirmed the findings of a 1980 Centers for Disease Control study that said there was an excess incidence of leukemia among veterans who had participated at test shot "Smoky" at the Nevada Test Site in 1952.

And it also said there appeared to be a slightly higher-than-normal incidence of prostate cancer among witnesses to blasts in the "Redwing" test series on Pacific atolls in 1956—a result the authors seemed to discount "since prostate cancer has

never been demonstrated to be one especially susceptible to induction by radiation."

They also said the "Smoky" results must be considered in the context of the broader findings of no excess leukemia among witnesses at the four other test series in Nevada and the Pacific—or at other test sites worldwide.

The subject has led to disputes between veterans and the government over possible federal responsibility for cancers now developing among participants in above-ground tests in the 1950s.

Gloria Christopher, executive director of the National Association of Atomic Veterans, dismissed the new study as "garbage . . . ridiculous."

Chief among her complaints was that the study compared health problems of the atomic veterans with those of men in the general population rather than with 1950s veterans who weren't exposed to radiation.

The study pointed out the same apparent weakness.

## Shiite soldiers raid refugee camps as a new round of fighting begins

BEIRUT, Lebanon (AP) — Israeli soldiers raided a Shiite Moslem village in south Lebanon on Monday and seized 40 men in what was seen as a warning to Shiites militiamen operating in the south.

There was a new round of fighting in Beirut as Shiites from a launched attacks on Palestinians in the camp's refugee camp. Palestinian sources said eight people were killed and 31 wounded in clashes around the camp, raising the casualty toll since May 19 to at least 510 killed and 2,000 wounded.

Israeli forces are due to complete their withdrawal from Lebanon in the next few days and the raid was considered a clear warning that Israel would not tolerate Shiites attacks on the South Lebanon Army.

Israeli troops in tanks and armored personnel carriers swept through the village of Majdal Salim, six miles west of the Israeli border. The village is in the zone policed by United Nations peacekeepers and U.N. spokesman Timur Goksel reported that the Israelis blew up three houses and took 40 men from the village.

Israeli forces are due to complete their withdrawal from Lebanon in the next few days and the raid was considered a clear warning that Israel would not tolerate Shiites attacks on the South Lebanon Army.

The South Lebanon Army, or SLA, is supported by Israel and holds positions in the zone along the border. Goksel said SLA troops accompanied the Israelis who roared into the village with three tanks and 23 armored personnel carriers.

He said the Israelis rounded up 160 men in the village school, but released 120 after a fierce struggle.

Lebanese security sources who spoke on condition they not be identified said the raid appeared to be reprisal for the abduction by the Shiites Amal militia of 27 SLA militiamen in the area.

# Love, family relationships paramount, church leader tells fireside audience

By AUDREY GADZEKO  
University Staff Writer

Love is a special feeling and those who radiate it truly have the spirit of God, said Elder Robert B. Harbertson, a member of the First Quorum of Seventy of the LDS Church, speaking at Sunday's 15-stake fireside.

"Love is very important in relationships between parents and their children and between husband and wife," he said. "The greatest gift a father can give his children is to love their mother."

The bible passage "A new commandment I give to you that ye love one another," illustrates this point, said Elder Harbertson. The state of our personal relationship with our parents, our relationship with our spouse and our children must always be paramount in our lives, he added.

As a child Elder Harbertson explained, he knew the love of parents when he was younger than needed. Although he was 31 years old when his father died, he still missed him a great deal. "Dad was my hero and I missed him so much when he was gone."

The song "Everything I Own," by the musical group Bread, tells of a young man expressing his

feelings for his dead father, said Elder Harbertson. "We must live each day so we may not have regrets."

"The scriptures are full of good illustrations of the kind of family relationships that must be strived for," he said.

The story of the relationship between Ruth and her mother-in-law, Naomi, should serve as an example, he said. "What a choice relationship existed between those two."

"Great love and trust must have existed between Alma and his son, Shiloh, whom Alma commanded for his faithfulness," Elder Harbertson said. Shiloh was the name of the message in which Heavenly Father introduces Jesus Christ to the Zoramites, he said. "... and I have often thought how proud Heavenly Father must have been when he said, 'Behold my beloved son, in whom I am well pleased.'"

Family relationships are of unending importance for his dead father, said Elder Harbertson. "We must live each day so we may not have regrets."

Elder Harbertson said. He quoted President Kimball as saying, "What more is there concerning your family? Tell them to say you have followed the living prophets! Have your children felt the tender loving care of their father? Have you taught them faith and obedience to his commandments?"

Home is where children feel safety, love and protection, said Elder Harbertson. Parents and children must therefore strive for understanding and happiness in their homes. Life, he said, should not be lived with regrets, as expressed in the song "Cats in the Cradle," by Harry and Sandy Chapin.

Family relationships greatly affect a person's attitude toward life and its importance in a child's life is his or her parents'. Each moment of experience and each stage can be lived only once."

Elder Harbertson quoted Richard L. Evans as saying, "Happiness is a matter of learning to respect the present hour — learning to live each day."

Although most people desire hope and happiness, they seem to do that which is contradictory to achieve this, he said. "God stimulates and nourishes good. Fear not to do good... For what ye shall sow so shall ye reap."

ELDER ROBERT B. HARBERTSON

## Alpine board gets good news; school cost less than expected

By BRACH SCHLUETER

University Staff Writer

Alpine school board officials this past week received some good financial news for a year in which it was announced that construction of a new junior high school in Lehi would cost some \$1 million less than the district had originally planned.

The contract for building the new school was awarded to Paulsen-Ellsworth Construction Co., whose bid of \$6,299,995 was lowest among 11 other contractors. Board officials had originally projected the cost to be at least \$7 million.

The district imposed a May 1, 1987, deadline for completion of the new school, but Dr. Harold Jacklin, director of district construction, said the company would have equipment on the 700 East Hollow Road site in Lehi this week and would

finish the job by Dec. 1, 1986. The school is expected to house 1,200 students.

The Honeywell Corporation is offering the district a gift of an energy-saving computer system for the new school. The system will control the heating, cooling, ventilation, heating, security and bell systems for the new school. The board will not make a final decision of whether to accept the gift until the costs for its installation and interfacing have been discussed further. The total cost is estimated to be approximately \$32,000.

Jacklin said the system would pay for itself in a few years because of the money saved on energy costs.

With the district's troubled financial situation in mind, board members are also being cautious about the purchase of property for future school sites.

A saturation study from the current

budget suggested sites in Orem, Lindon and American Fork be purchased at an estimated cost of \$855,000 before future land prices go up.

Board Member Jan Lewis, however, questioned the prudence of such action in the face of other needed repairs on existing buildings in the district.

District Superintendent Dr. Clark Cox said the purchase of new property could certainly be off the board members' list of priorities until the district actually needed the sites.

"We must be appropriately farsighted without hurting current needs," said board President Richard Sudweeks.

Lewis said there are current, pressing needs and suggested the board first look at year-round sessions in the district as a solution to growth problems.

## Trial date set for Genola teen-ager accused in foster home shooting

A tentative date for the trial of a Genola teen-ager accused of killing his foster parents has been set for Aug. 12 in Salt Lake City.

Nicholas Alan Clatterbuck, 16, will stand trial for two counts of criminal homicide beginning Aug. 12 at 9:30 a.m. before Judge Cullen Y. Christensen. According to Michael Espin, one of the teen-ager's attorneys, the trial should last from five to seven days.

The two first-degree murder charges

stem from the 1984 deaths of a Utah County couple, Gordon Kent Burke, 42, and Sonnie L. Burke, 36, were shot to death in their Genola mobile home on Feb. 23, 1984.

The teen-ager had been living with the Burkes, who were his legal foster parents, for several months before the shootings.

On May 24, Clatterbuck entered a dual plea of "not guilty or, in the alternative, not guilty by reason of insanity" to the two

murder charges. Under that plea, the teen-ager must now undergo a psychiatric evaluation at the Utah County Hospital by a panel of three.

Clatterbuck's examination will occur sometime within the next 30 days under a motion filed by Espin in the teen-ager's behalf.

The Utah County Sanitary Administrator will appoint two mental health experts to perform the evaluation, said Espin.

## Sen. Garn's 'Discovery' experience strengthens his interest in space

By TOM WALTON

Senior Reporter

Sen. Jake Garn's life-long involvement in flight has given him a strong commitment to this country's exploration of space. His recent flight aboard the space shuttle Discovery has only served to strengthen this commitment.

Garn's father began flying in 1917 in Richfield, Utah. "He didn't own a home, but he had an airplane," said Garn. "He was Utah's first aeromotorics supervisor in 1937."

"My mother lived in constant fear of flying. It's a good thing she's gone now, because she couldn't have coped with a space flight," Garn said.

The shuttle has been directly involved with the space program during his 10-year tenure in the Senate.

"It's highly important that we go on with our research and development program for space," said Garn, referring specifically to President Ronald Reagan's defensive "Star Wars" proposal.

"If President Reagan should give that go-ahead for a bargaining chip in the arms talks in Geneva, I would leave his position very fast. The very fact the Russians don't want us to continue in the research makes me want to keep going," Garn said.

No matter the cost of the shuttle

program, Garn is convinced it is worth the price. He cited technological advances in communications, navigation and medicine as direct results of the shuttle flights.

Perhaps Garn's most important physical contribution to the Discovery mission was the testing he went through to learn more about stomach sickness in space.

"I hope I've been helpful," said Garn, smiling. "I think I did a pretty good job, but I think it was my bowel shutting down in the weightlessness."

"The sickness is not totally debilitating, and after a while the brain is able to adapt. After I got past the first days, I've never enjoyed five days more in my entire life," he said.

Space travel was not all seriousness and it presented some challenges in eating. "When you eat in zero gravity, you have to remember the food sticks by surface tension rather than gravity," Garn said. "As much sticks to the bottom of the fork as to the top. The first time I tried to eat, I got a lot of food on my chin. You just have to learn to open your mouth wider."

In space liquid is a perfect spider web in a container. Garn told how crew members tried to create the biggest sphere they could with about a quart of lemonade floating around in the cabin. They then had to suck the juice out of the air with straws.

## Incommunicado

From DNA nucleotide sequences to primate territorial displays, the unifying feature of life is communication. Yet as human beings we are held incommunicado from much of the biological world around us. This results not only from an inability to see ultraviolet images, to hear high frequency sounds, or to smell subtle pherome messages, but from a general insensitivity to the myriad life forms around us. For similar reasons we are also held incommunicado from much human communication if we do not make the attempt to understand other cultures and alternative modes of expression.

The story of the lost boy of Question and Answer Session 12:00 Noon Varsity Theater

Averyon teaches us that individual survival is possible without communication but that richness of human experience depends on the ability to receive and interpret messages. Be it the waggle dance of honeybees, chemical recruitment signals by ants, the fragrance of a jungle orchid, the genetic code of a bacterium, or even a chapter in *Finnegan's Wake*, almost any message can be correctly interpreted with due effort.

# Ed Eyestone leads tracksters to fifth-place national finish

By JACKIE LUCAS  
University Sports Writer

BYU's Ed Eyestone overcame some tough odds this past weekend to win both the 10,000 and 5,000-meter events at the NCAA Track and Field Championships in Austin, Texas.

Eyestone came 20th in the 20 of the Cougars' 28 points and led the team to a fifth-place finish in the 10,000-meter race. Brian Talheim followed with other 8 points and a second-place finish in the shot put. Talheim threw the shot put 68 feet, 7 1/4 inches. The winner in the shot put was John Campbell of Louisiana Tech, who threw it 68 3/4.

"Ed was the only athlete who competed in both the 5,000 and the 10,000 events, and I am very proud of his performance. The temperature was in the 90s and it was also very humid, and those two events are the toughest to compete in under those conditions," said Clarence Robison, BYU's head coach.

"I felt pretty tired for the 5,000, because the 10,000 took a lot out of me," said Eyestone. He had won the 10,000 race within 24 hours of the start of the 5,000.

It took a lot of strategy on Eyestone's part to win both events. During the 10,000, he stayed in the middle of the pack for the first half of the race, then

he made a surge for 3-4 laps to see if anyone would keep up with him and none of the other runners did.

"With two miles to go, I made my move to get ahead of the rest of the runners and once I got a big lead I knew the rest of the race should be pretty easy," he said.

A new strategy was needed for the 5,000 finals because it was run earlier in the evening than the 10,000 and with higher temperatures. Eyestone was feeling some fatigue from winning the 10,000 Friday and qualified for the 5,000 Thursday.

"I had raced most of the top runners earlier in the season in a 2-mile race at an indoor track meet and I beat them, so I decided to take it easy for the first mile of the race and make a surge at the 2-mile mark," he said.

When Eyestone made his surge with two miles to go, he realized that not many others were left in him to pull away from the rest of the pack, so he decided to run with the leaders for a few laps.

"With only 1 1/2 miles to go, I felt I would do good to finish in the top six, so I decided to continue running with the leaders and see what developed," he said.

Eyestone knew Peter Koehl of Washington State had a very strong finish, so Eyestone made a surge with four laps to go and got a small lead on the rest of the athletes. "At this point, I felt that I could

actually win the race and I got a sudden burst of energy that I really needed," he said.

Koehl was only 20 yards behind Eyestone in the final lap, and Koehl made a final surge to catch Eyestone but it was too late. Eyestone won the race in 13:56.72 minutes and Koehl finished second in 14:01.8. Eyestone won the 10,000 in 28:46.87.

Eyestone was motivated by more than his goal to win the season to win both events. His older brother, Robert, was killed in a boating accident on Memorial Day — less than a week before Eyesteone's two races.

"I knew Robert would want me to go to nationals and run my best, and I think it motivated me to run better because I knew he wanted me to win both races," Eyestone said.

Robison said he was pleased with the overall performance of the team, but he was not disappointed in any of the athletes because they proved they are among the best in the country by being at nationals. "I did not think we would finish in the top five, so I am happy things turned out the way they did," he said.

Arkansas finished with 61 points to win the meet. The other top finishers were Washington State, 46 points; Baylor, 37; Iowa State, 35; BYU, 28; Missouri, 27; Oregon and Houston, 26; Southern Methodist, Tennessee and Alabama, 25.

## Cougar football field undergoes innovative 'knitting' experiment

A large knitting project has been started at BYU's Cougar Football Stadium. The natural turf received a new look this week with a layer of bright-green yarn spread over its surface.

The natural turf tends to get torn under the pounding feet of BYU's football team, especially when the grass is wet. The yarn was mixed into the soil as an innovative, experimental solution to the wear-and-tear problem.

The 400 pounds of yarn, cut into four-inch lengths, was visible on the field only briefly. The ground crew melted the yarn into the soil, turned it into a sand-yarn mixture and then spread the mixture over the turf.

A machine sliced the turf and "knit" the mixture down into the roots. If the experiment is a success, the yarn will help anchor the grass to the deep root system.

"We have a good root system that goes about eight inches deep, but we still have wear problems," explained Roy S. Peterman, university grounds manager.

"We mixed yarn into the first few inches so it will become integrated with the roots of the surface grass and help secure them to the deeper root system," Peterman said. "Hopefully this will prevent football players from taking clumps of grass off the open playing field."

The yarn is made of 100-percent nylon and is a type used to make carpeting. At a cost of \$1,000 to \$1,500, Peterman said the experiment could prove to be a bargain if everything works as expected.

Purdue University recently tried to have tried the "carpeting" experiment. Purdue University has tried the procedure on its football field, and several other universities are considering trying it, Peterman said.

A yarn-sand mixture is spread onto the Cougar Stadium football field before it is eventually worked into the turf. Ground officials hope the yarn will strengthen the present root system of the grass.

## Holiday earns All-America award

It was a disappointing finish for the BYU women's track team as they participated in the National Collegiate Athletic Association Championships in Austin this weekend.

Even though the team consisted of eight quites, the most ever competing for the Cougars, only one team member was able to score. Jill Holtzman finished fourth in the 3,000-meters, giving her the fourth All-America award of her career.

Holiday qualified for the 3,000-meters on Wednesday and ran in the finals on Friday night, just missing third place in the event.

Thursday, five athletes were entered in the preliminary track and field competition and all five qualified.

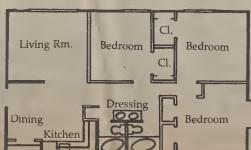

Aisling Molloy, an All-American in the NCAA Indoor Championships this year, failed to qualify in the 1,500-meters. She was eight seconds slower than her season's best mark in the event.

Janell Burgeson, a previous All-American, missed qualifying for the finals in the 10,000-meters.

The top-six finishers in NCAA championship events qualify as All-Americans.

# Boston Garden, fans hoping for a 6th game

INGLEWOOD, Calif. (AP) — Boston Garden is waiting.

The 15 championship banners and the retired uniform numbers hanging from the rafters are waiting.

The 14,890 who make up the various capacity crowds are waiting.

They're waiting to work their magic on the Los Angeles Lakers.

They're waiting to continue the Celtics' mystique of never losing the final game of a National Basketball Association championship series at home.

But they may never get the chance to do it again, because the NBA is changing the regular season format.

The Celtics believe their "homecourt advantage" in the finals has been severely diluted by a travel format that is being used for the first time in 30 years.

To save travel costs and alleviate travel fatigue, NBA owners voted to have the first, second, sixth and seventh games at home with the other team hosting games three, four and five. The previously used format was to play two games in one city, the next two in the other and then to hop from city to city until the best-of-seven series was settled.

Cooper and New Mexico's shortstop Jim Fregosi were also named to Converse's first-team All-American.

Others selected to the District 9 team were the following: Dave Brundage, a first baseman from Oregon State; Vince Porreco, a second baseman from Wyoming; Fregosi; Chris Shultz, a third baseman from Utah; Greg Hall, a catcher from New Mexico; Chris Gwynn, an outfielder from San Diego State; Don Lovel, an outfielder from Portland State; Mario Monico, an outfielder from Hawaii; Rick Mock, a designated hitter from Colorado State; and Dean Duane, a pitcher from New Mexico and a third-team All-American selection.

Cooper batted .420 for BYU this season with 22 home runs and 84 runs batted in.

Beavers, the leading pitcher for BYU, had a 14-5 record with a 3.48 earned run average this season.

Jeff Brown and Brian Carroll were the only other Cougars selected to the District 9 squad on the second team.

for eight days.

"Meanwhile, we get bored, sitting around the hotel and doing nothing. You play a game and sit around three days. It's not good."

The Lakers, after winning the second game of the series at Boston Garden, and in the game 3-2 on Sunday at the Hollywood Forum, have a chance to win the championship without having to return to the East Coast.

If they should have a 3-2 lead, history would not be on their side. The Celtics are the only team to win the first six games of a series and still lose it. The Lakers are 0-3 in the finals against Boston.

If but let it sound like sour grapes, the Celtics were unhappy with the 2-2-2 format even after winning the series opener 148-114. They knew if they didn't win Game 2, and they didn't, they could be in trouble.

"I never did like it from the start," said Larry Bird, the Lakers' star.

"I wish it was the old format," said the Celtics' Kevin McHale. "There's no use crying in your soup, but we're at a disadvantage."

Not surprisingly, the Lakers are happy about the prospect of two more games in front of a friendly crowd.

"It's like a lot," Lakers guard Byron Scott said. "That's less traveling. I think it's a lot more reasonable."

## NBA names Bird 1984-85 winner of MVP award

INGLWOOD, Calif. (AP) — Larry Bird of the Boston Celtics was named the Most Valuable Player for the 1984-85 National Basketball Association season Monday, joining four others who have won the award in consecutive years.

The 6-foot-9 Bird was second in the league in scoring at 23.7 average this season and averaged 5.5 rebounds and 6.4 assists. He led the Celtics to a 63-19 record, the best in the NBA.

He also was among the league leaders in free-throw percentage at .882 and set a team scoring record on March 12 with 60 points against Atlanta.

Bird joins Boston's Bill Russell (1961-63), Philadelphia's Wilt Chamberlain (1966-68), Kareem Abdul-Jabbar of Milwaukee (1971-72) and Los Angeles'埃尔维斯·佩顿 (1977-79) as the only players to repeat as MVP winners.

Bird has struggled in the playoffs although the Celtics have reached the finals and trail Los Angeles 2-1. After making 52.2 percent of his field-goal attempts during the season, he has hit only 46.8 percent in 17 playoff games.

# President Holland announces appointments at conference

President Jeffrey R. Holland announced ten high-level appointments Friday at BYU's annual spring leadership conference.

Associate Vice President John B. Stohlton was named executive vice president, replacing Jim Roche Kerr, who was recently appointed Utah's commissioner of higher education.

Maren M. Mouritsen, associate

of Student Life and executive

assistant to the president, was promoted to executive vice

president for Student Life.

Ronald G. Hyde, assistant executive vice president for University Relations, was promoted to assistant to the president for University Relations.

William E. Evenson, a professor of

physics and former dean of General

Education, was appointed academic vice president with responsibility for religious education, general education and the honors program.

He replaces Noel B. Reynolds, who

is taking professional development leave to do research at the University of Edinburgh in Scotland.

F. Lamond Tullis, a professor of

political science and former chairman

of the Political Science Department,

was appointed associate academic vice president with responsibility for graduate studies, libraries and research. He replaces Neal E. Lambert, who is taking professional leave to do research at the American Antiquarian Society Library in Worcester, Mass.

Both Evenson and Tullis will serve under Academic Vice President and Provost Jae R. Ballif.

Marilyn Arnold, a professor of English and former assistant to the president under Dallin H. Oaks, was named dean of Graduate Studies, a new position in the Holland administration.

Stan L. Albrecht, a professor of sociology and chairman of the Sociology Department, was named new dean of the College of Family, Home and Social Sciences. He replaces Marald H. Hansen, who has served 17 years in the post and is taking a leave to do political science research in Vienna, Munich and Stockholm.

Grant W. Mason, a professor of physics and associate dean of General Education, was named dean of the College of Physical and Mathematical Sciences, replacing J. Rex Goates, who retires this summer.

Richard C. Eddy, assistant dean of

Continuing Education, was appointed dean of the Division of Continuing Education. He replaces William R. Siddoway, who will take another appointment at the university.

Mary Anne Wood, associate professor of law, has been appointed

associate dean of the J. Reuben Clark Law School by President Holland. She will replace Gerald R. Williams, who is taking a professional development leave to pursue a research fellowship at the Harvard Law School.

# Opera 'Ruddigore' will open outdoors

By KIMBERLY LEWIS  
University Staff Writer

Opera under the stars began its tradition at BYU in the summer of 1977 and will carry on the custom this year with the production of a Gilbert and Sullivan operetta.

This year's Gilbert and Sullivan musical satire, "Ruddigore, or the Witch's Curse," will open Thursday in the Northwest Court of the Harris Fine Arts Center.

The production will be preceded by chamber music and a short Spring Symphony concert under the direction of David Dalton, conductor, and Dan Perkins, assistant conductor.

"Ruddigore" is so funny because, like all Gilbert and Sullivan operas, it's so absurd, said Dennis Todd, a junior from Santa Ana, Calif., who plays the Baronet of Ruddigore, the male lead in the operetta.

"The 'Ruddigore' plot, which makes fun of Victorian melodrama, revolves around amusing and far-fetched situations of clever misunderstandings, hidden identities, thwarted loves and inevitable reconciliations."

At the core of the problem is the witch's curse that requires that the Baronet of Ruddigore commit a bad crime every day or suffer a dishonorable death. The Baronet cannot live up to the demands of the curse, so he hires and consorts his identity and assumes the life of an innocent farmer, leaving his brother to assume the role. Ultimately, chaos results as secrets are revealed and complications ensue.

The opera is "delightfully making a poke at human foibles," said Clayne Robison, the producer of "Ruddigore" and a BYU music professor.

Opera is a difficult genre to make such a production successful is tremendous. Man-hours total at least 5,000, with 32 cast members, 31 technical staff and 38 orchestra members.

One would think a production of this magnitude would be riddled with problems, but it is not,

according to Robison. An outdoor production is not much different from an indoor production. The Northwest Court does not distort the acoustics, and its overhead shell provides protection from any inclement weather.

Rather than trying "to put the square box in the round hole" like many performing groups who choose the piece to be performed before the auditions, BYU opera productions are done just the opposite. The auditions took place first to determine what production would best serve to educate and fit into the range of voices, Todd said. Young voices can be damaged if required to perform too demanding a role.

"Being surrounded by so much absurdity intensifies the reality of life," Todd said of "Ruddigore." There are little snatches in the opera that can be portrayed as serious. Gilbert and Sullivan productions are so much like life — because life is absurd, he said. With the help of director Christian Heppe, Todd said he could easily get lost in the role and run with it, being free to interpret the baronet as he wishes.

Though one of the purposes of the opera is to entertain the community, faculty and students, Robison said the main purpose is to help students in "learning how to deal well with one another."

BYU has one of the largest college opera companies in the country, and only a handful of universities have more operas.

Many roles are double cast to "accommodate the many talented voices we have," explained Robison. Starring roles on Thursday, Saturday and June 12 will be taken by Ruth Christensen, Stephanie Hills Asay, Dennis Todd, Peter de Graaf, James Murphy, Katherine Jensen, Jay Thompson and Jon Hansen. Performances Friday and June 11 will be for Day, Pennie Vee Peterson, Todd, van der Valk, Dennis Arbizu, Lila Burrie, Thompson and Matt Bean.

Dan Perkins is musical director of the operetta. Steve Gray and Colleen Hawkes are choreographers and Sandy Gray is the costumer.

## BYU announces its award winners for theater acting

Sunday night the national theater community announced the Tony Awards. BYU's Department of Theater and Cinematic Arts earlier announced its own award winners.

Brian Newbold and M'Lissa Bailey won top honors in the annual award presentation.

Newbold won best actor accolades for his role in "Semmelweis." For her portrayal of Anna in the "King and I," Bailey won the award for best actress.

David Morgan and Melinda Wood garnered honors for best character performances.

Morgan portrayed the trick cyclist in "Til the Fat Lady Sings."

For their supporting roles, Linda Szczepanska, who was in "Misalliance," and Cheryl DeMeester, who played Emilia in "Othello," were honored. Another "Misalliance" actor, James Claffin, won the male supporting actor award.

May Ann Pasey and Nolan Goodwin received the Betty Hanson Educational Theater Award. Walter Davenport received the Kathryn B. Pardo Award. Art Poynter received the T. Earl Pardo prize.

Theater and Cinematic Arts Department chairman Dr. Harold Oaks directed the presentation of the awards.

'Let's Make a Deal' may move to Orem

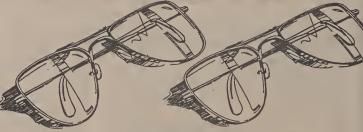

OREM (AP) — The pink bunny suits and quick-profit action of the syndicated television show "Let's Make a Deal" may move to Orem this summer.

Mark Stone, spokesman for the show's producer Telepicture Inc., said Sunday the show will move from Los Angeles to the Osmond Studios on the California Coast if the game jaded, Stone said.

"I see this as a very grand experiment," he said. "If it works, we may bring others."

Stone said the deal is more than 90 percent certain.

## Astronaut marriages blast off

By JENNIFER J. JOHNSON  
University Staff Writer

He was 34. She was 32.  
He was a pilot. She was a pilot.  
He got married. So did she — to him.

Drs. Gibson and Rheta Seddon, who were on campus Saturday for a presentation and panel discussion with members of the BYU community, waited until later in life to get married. They were both well established in their careers. Interestingly enough, these careers were what brought them together and, according to the Seddons, is what helps keep them together today, four years after their wedding.

During a personal interview after a panel discussion with students, Seddon said that he met his wife in 1978. They enjoyed flying together on the T-38 supersonic jet. They were both very involved in flying and the space program.

This common vocational interest led them to become the second of three two-member astronaut marriages, according to Seddon.

Astronaut Sally Ride and her husband Steve Hawley were the first astronaut couple. Astronauts Bill and Anna Fisher became the third "space couple" in 1980.

Both Seddons said their commitment to their separate careers and to each other's careers has been some

Universe illustration by Ron Bell

what stressful but, more importantly, a decided plus to their marriage.

"We not only have our own flights to worry about, but our spouse's flights," said Mrs. Seddon. "But we feel it's very important."

Mrs. Seddon said she has gone through too much school and medical experience to abandon her career just because she is married.

"You have to live up to people," she said in reference to people who encouraged her to pursue her education model for America's young women.

## 'Big River' dominates awards; Neil Simon wins his 1st Tony

NEW YORK (AP) — "Big River," the musical adaptation of Mark Twain's classic novel "The Adventures of Huckleberry Finn," dominated Sunday night's Tony Awards, while Neil Simon's "Bixby Blues" won his first Tony for best play.

"Big River," starring Avery Corman, won best musical and best score, also checked up awards for best book, musical, best director — musical, best supporting actor — musical, best scenic design — musical and best lighting design — musical.

Simon's award for best play came after over two decades of writing plays.

"I always dreamed, naturally, of winning a Tony," Simon said. "I just didn't think I'd have to dream through 22 plays to do it. But it was worth the sleep."

Priorities to this year's Tony for best play, Simon won a Tony for best author with his well-known play "The Odd Couple." He had also been given a special award by the Tonys committee. But he had never won for best play.

Best actor award went to Derek Jacobi for his portrayal of Benedick in the Royal

Shakespeare Company's production of "Much Ado about Nothing."

"This is icing on a very, very rich cake," the jubilant Jacobi said. "Before I suffer from chronic indigestion, thank you very much."

Stockard Channing, who played the mother of a severely retarded girl in "Joe Egg," which won the award for best revival of a play, won the award for best actress and show costume Florence Klotsz picked up her fourth Tony award for best costume design.

"Grind," a big-budget musical about a black and white Chicago burlesque house, won two prizes. Leilani Jones captured the best featured actress award and show costume Florence Klotsz picked up her fourth Tony award for best costume design.

Quality. It's as important in diamonds as in anything else you own.
